

Masterclass Breeding / Trialling Technician m/f

Are you from or interested in the agricultural world and/or looking to work or orient yourself in this field?

Are you willing to relocate throughout France and Germany to gain a rich experience and discover our professions?

The RAGT 2N Masterclass is for you!

RAGT 2N, the research subsidiary of RAGT Semences and a major player in the breeding of field crop seeds, is hiring Breeding/Trialling Technician m/f for its research centers in France and Germany.

During this training program, you will learn the profession of selection and experimentation from our internal experts and discover 3 of our research stations over a period of 18 months.

Your mission:

Participation in breeding and trialling activities:

- preparation and setup of sowing
- participation in sowing, transplanting, recording, and harvesting tasks
- driving agricultural machinery
- computer management of activities
- coordination and supervision of personnel

Your profile:

- with or without professional experience/training in the agricultural field
- open to career changes
- basic computer skills
- Driving license B required
- German and/or English desired
- mobile in France and Germany
- precision + versatility + listening skills + organizational and interpersonal skills

Your conditions of employment:

Locations: Mobile in France and Germany across 3 of our research stations.

Contract duration: 18 months evolving into a permanent contract (from January 2025)

Compensation: Attractive salary and benefits package to support your career path.
